ABACUS

Checklist for Connection DeepBox

Class   C1 / Public
Version   V1.0
Date   20/01/2021

Checklist "DeepBox connection to Abacus"

Requirements for the DeepBox connection

☐   Installed Abacus Version 2020 from SP 15.05.2021
       Installed Abacus Version 2021 from SP 15.05.2021
       installed Abacus Version 2022 from Release 15.02.2022

       We recommend that you work with the latest service pack.

☐   Abacus is "externally accessible"

☐   Abacus user with administrator rights available to start "Q908 DeepCloud Administration"

Licences

☐   Accounts Receivable, Accounts Payable and/or Financial Accounting *For entry in the AR/AP/GL*

☐   Business Process Engine
       at least 1 user with BPE rights who can start processes

Document processing

☐   Entry in Accounts Receivable/Accounts Payable
       v2020 from SP 15.05.2021
       v2021 from SP 15.05.2021
       v2022 from SP 15.02.2022

☐   Entry in financial accounting v2021 from
       SP 15.03.2022
       v2022 from release 15.02.2022

Information: For automatic document processing via DeepBox, the respective client must be pre-configured. The company and supplier defaults must be defined so that the entry works correctly.

We strongly recommend that you work with the latest Hotfix/ServicePack.
